DT85

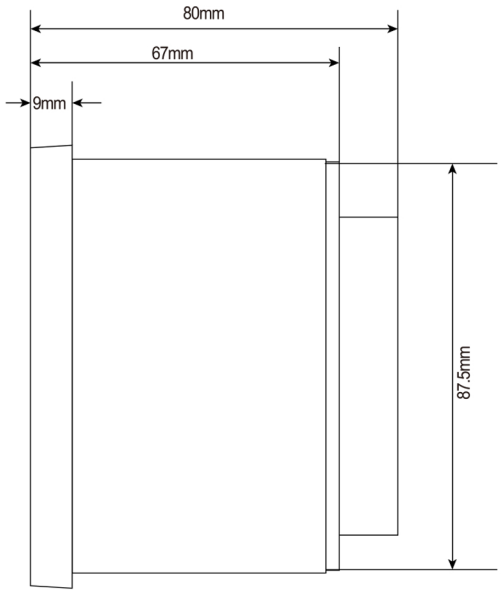

Weighing Indicator&Transmitter

DT85 is a cabinet-type multifunctional weight transmitter, which can be used as an independent 4-channel, or 4 non-independent channels linked by a junction box, and can diagnose the condition of each connected sensor. Many interfaces make it suitable for any automation system.

Dimensions (in mm)

Specifications

Installation	Panel installation
Power Supply	12~24Vdc； 90mA/24V
Maximum powerful	185mA/12V； 90mA/24V
Working Temp.	-10℃~40℃（14℉~104℉）
Sample rate	Max.200 times/s
Sensor excitation	DC 5V±5%
Display screen	10mm; 6-digit
Status indicator lamp	6 LED
COM port communication	RS485/RS232
Input/output interface	2 input /2 output
Analog output	4-20mA; 0-5V; 0-10V
